How to Make Buttons

1. Use the hole punch to cut out your picture.

2. Make sure the button machine die is rotated so you see the white **Front** label.

   **A.** Place one metal shell straight down into the circular opening. Ridges should face down.

    B. Place your picture on top of the metal shell.

    C. Place one clear plastic circle over your picture.

**3.** Rotate the die completely to the **left**. Make sure you see the white **Back** label.

    A. Place the pinback in the circular opening. The pinback should be facing down. Be sure to position it correctly!

4. Pull the red handle all the way down.

    A. Lift the red handle completely up.

5. Rotate the die completely to the **right**. Make sure you see the white **Front** label.

    A. Pull the red handle all the way down.

    B. Lift the red handle completely up.

    C. SUCCESS! Rotate the die to the **left** and take your pin!
